INTRODUCTION

This guide will go over how to install O-rings on the backspace, spacebar, shift, and enter keys on your keyboard.

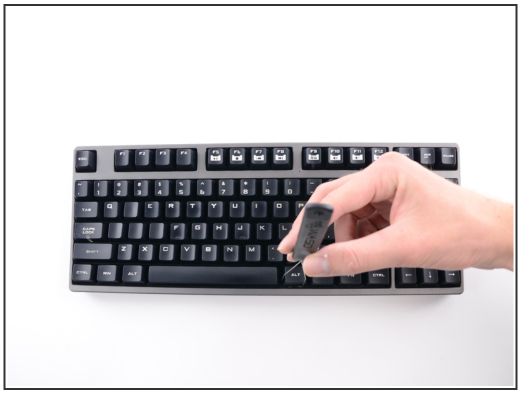

TOOLS:

- Keycap Removal Tool (1)
- Tweezers (1)

PARTS:

- Cherry MX Rubber O-Ring (1)

Step 1 — O-ring: Large Keycap

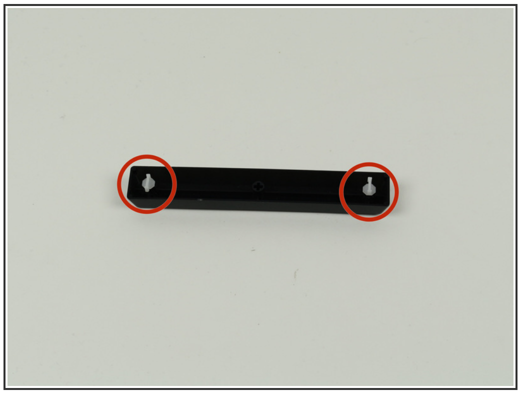

- Remove keycaps surrounding the key you'd like to install an O-ring under by following the remove small keycaps guide.

Step 2

- Pull the large keycap upward with your fingers until the cap separates from the plastic rings underneath the cap. If the metal bar beneath the cap comes loose during removal, snap it back in place.

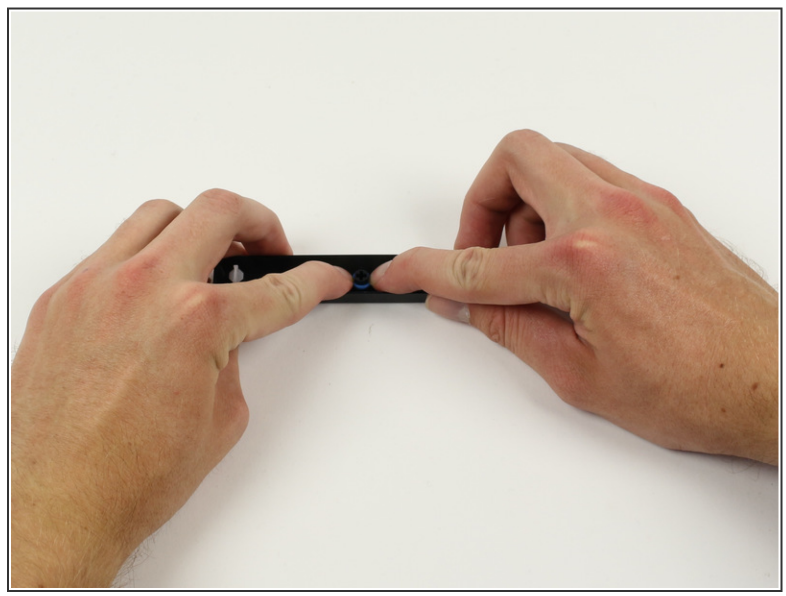

Step 3

- Remove the plastic rings from the keycap.

Step 4

- Place the O-rings around the nubs underneath the keycap at each circled locations.

To reassemble your device, follow these instructions in reverse order.
